### Media Information

#### *Matt Paper*

This media gives the same high quality reproduction as the semi gloss paper only in matt version for a discounted price, ideal for the short term promotions.

#### *Semigloss Paper*

For low cost, short-term indoor graphics such as vivid posters, shopping centre displays, photo-realistic image reproductions, and professional trade show graphics.

#### *Poly Prop*

Poly Prop, also known as Synthetic Paper, gives you the look of photographic media without the high price. Durable, versatile and tear-resistant, this media is an excellent choice for producing indoor banners, point of sale posters, shopping centre posters and short-term information signs - a cost effective poster printing solution.

#### *Lightbox Film*

Lightbox Film, or, as it is sometimes called, Backlit Film, offers vivid colours and an exceptional translucency for dramatic backlit prints that come to life when lit.

#### *Canvas*

The PosterBox Canvas is an acid-free, matte finish, highly-textured, artist stretch canvas designed for long-term, fade resistant fine art or photo reproductions. The 100% cotton canvas has a specifically designed coating which delivers superior colour gamut and resolution. Our canvas has the added bonus of water resistance.

\*Prices are subject to change. Pricing listed on website are always up to date and are final. Current as at 10 December 2008
